Sir:

In response to the Office Action mailed April 9, 2001, please amend the specification as follows:

IN THE SPECIFICATION:

Please replace page 9, paragraph 1 with the following:

a
Referring now to Figure 7, one suitable connector 32 is illustrated. As described herein, the connector is referred to as a universal connector because it comprises a number of jacks including a phone jack 72, a LAN jack 74, a cable jack 76, and a satellite jack 78. Preferably, at least one jack is located in each room of the house. Also, at least a satellite connection is provided. Such a system is particularly suitable for DirecTV® or DirecPC™ because both require a twisted pair of phone jacks 72 and a coaxial cable for its uplink and downlink signals respectively. Because homes of the future are likely to have a local area network therein, an IP address 80 may be associated with each jack.
